BIOELECTROCHEMISTRY AND BIOENERGETICS

Subject Index of Volume 38

α, β dispersion
Dielectric behavior of spherical cell suspensions in relation to diffusion effects and presence of a nucleus (Gheorghiu) 123
Acetylcholinesterase
Liposome and proteoliposome fusion onto solid substrates, studied using atomic force microscopy, quartz crystal microbalance and surface plasmon resonance. Biological activities of incorporated components (Ohlsson et al.) 137
Acinar cell
Electropulsing of acinar cells isolated from rat pancreas: dependence of reversible membrane perforation on cellular energy state (Kosowski et al.) 377
Adenosine 5′-triphosphate
Electropulsing of acinar cells isolated from rat pancreas: dependence of reversible membrane perforation on cellular energy state (Kosowski et al.) 377
Adsorbed complexes
Cyclic voltammetry of mitomycin C and DNA (Teijeiro et al.) 77
Adsorption
Electrochemical study on the interaction between cytochrome *c* and chlorophyll *a* (Agostiano, Catucci) 15
Cephalosporin antibiotics at carbon paste and modified carbon paste electrodes in both aqueous and biological media (Abo El-Maali et al.) 91
Adsorption immobilization
Investigation of the electrochemical properties of horseradish peroxidase adsorbed on solid graphite in the presence of monoclonal antibodies against the enzyme (Yaropolov et al.) 401
Anabaena
The 36 kDa form of ferredoxin–$NADP^+$ reductase from *Anabaena* co-purifies with phycobiliproteins (Razquin et al.) 57
Antitumor treatment
Biomedical applications of electric pulses with special emphasis on antitumor electrochemotherapy (Mir et al.) 203
Artificial muscle model
Artificial muscles based on conducting polymers (Otero, Sansiñena) 411
Artificial photosynthesis
Light energy conversion with chlorophyll *a* and pheophytin *a* monolayers at the optically transparent SnO_2 electrode: artificial photosynthesis (Volkov et al.) 333
Ascorbic acid
An in vitro electrochemical sensing of dopamine in the presence of ascorbic acid (Kawde, Santhanam) 405
Atomic force microscope
Measuring surface forces in aqueous electrolyte solution with the atomic force microscope (Butt et al.) 191
ATP-ases
Acid–base reactions as driving force in metabolism, ATP synthases and ion-motive ATP-ases: the role of the oxide anion (Madeira) 45
ATP synthases
Acid–base reactions as driving force in metabolism, ATP synthases and ion-motive ATP-ases: the role of the oxide anion (Madeira) 45
Avidin coating
Measuring surface forces in aqueous electrolyte solution with the atomic force microscope (Butt et al.) 191

Background noise
Electrophysiological and electrochemical techniques for studying control mechanisms of secretion in neuroendocrine cells (Neher, Chow) 251
Bacteriochlorophyll *a*
Electrochemical study on the interaction between cytochrome *c* and chlorophyll *a* (Agostiano, Catucci) 15
Band-3 conformation
Red cell echinocytogenesis is correlated to the recruitment of external band-3 conformations (Gimsa) 99
Band-3 inhibitors
Red cell echinocytogenesis is correlated to the recruitment of external band-3 conformations (Gimsa) 99
Bilayer micromembrane
Time-dependent variation in a.c. impedance of lipid-impregnated membrane filters (Ikematsu et al.) 343
Biomembrane model
Time-dependent variation in a.c. impedance of lipid-impregnated membrane filters (Ikematsu et al.) 343
Biopolymer-supported electrofusion
Increase of protoplast electrofusion supported by dextran fractions (Jiang, Berg) 383
Biopolymer synthesis
Possibilities and problems of low frequency weak electromagnetic fields in cell biology (Berg) 153
Biosensor
A method to detect superoxide radicals using Teflon membrane and superoxide dismutase (Song et al.) 419
Blood vessels
Electrical stimulation-induced release of dopamine and noradrenaline in human blood vessels (Morgadinho et al.) 281
Brain
Fast cyclic voltammetry: neurotransmitter measurement in "real time" and "real space" (Stamford et al.) 289
Bursting current oscillations
Spontaneous periodic and bursting current oscillations in iron corrosion by dichromate: a useful study for simulating biological systems (D'Alba, Lucarini) 185

Ca^{2+}-ATPase system
Fluorescence anisotropy of fluorescein phosphatidylethanolthiocarbamide in lipid bilayers and in Ca^{2+}-ATPase/lipid reconstituted systems (Henao et al.) 117

Elsevier Science S.A.

Ca^{a+} influence
Electrostimulation of macrophage NADPH oxidase by modulated high-frequency electromagnetic fields (Gamaley et al.) 415
Ca, Mg and K tunings
Testing the ion cyclotron resonance theory of electromagnetic field interaction with odd and even harmonic tuning for cations (Smith et al.) 161
Capacitative coupling
Electrostimulation of yeast proliferation (Fiedler et al.) 423
Ca^{2+} pump
Acid–base reactions as driving force in metabolism, ATP synthases and ion-motive ATP-ases: the role of the oxide anion (Madeira) 45
Carbon-fiber microelectrodes
Electrophysiological and electrochemical techniques for studying control mechanisms of secretion in neuroendocrine cells (Neher, Chow) 251
Fast cyclic voltammetry: neurotransmitter measurement in "real time" and "real space" (Stamford et al.) 289
Carbon fibre electrode
Catecholaminergic transmission in the central and peripheral nervous system as studied by electrochemistry with carbon fibre electrodes (Gonon) 247
Carbon fibre microelectrode, preparation of
Analysis of the performance of microelectrodes by cyclic and differential pulse voltammetry techniques (Eichenberger et al.) 315
Carbon paste electrode
Cephalosporin antibiotics at carbon paste and modified carbon paste electrodes in both aqueous and biological media (Abo El-Maali et al.) 91
Carboxyl, lysine and arginine modification
The role of flavodoxin in the reaction catalysed by the glutamate synthase from *Monoraphidium braunii* (Vigara et al.) 21
Catalytic mechanism
A polarographic study of the catalytic mechanism of the iron-containing superoxide dismutase from *Escherichia coli* (Argese et al.) 397
Catalytic polarographic waves
A polarographic study of the catalytic mechanism of the iron-containing superoxide dismutase from *Escherichia coli* (Argese et al.) 397
Catecholamine release
Electrical stimulation-induced release of dopamine and noradrenaline in human blood vessels (Morgadinho et al.) 281
Catecholamines
The electrochemistry of neurotransmitters at conducting organic polymer electrodes: electrocatalysis and analytical applications (Mark, Jr. et al.) 229
The role of catecholamines as mediators in the glucose oxidase/glucose system (Alfaro et al.) 307
Cell-free synthesis
Possibilities and problems of low frequency weak electromagnetic fields in cell biology (Berg) 153
Cephalosporin
Cephalosporin antibiotics at carbon paste and modified carbon paste electrodes in both aqueous and biological media (Abo El-Maali et al.) 91
Charge separation
Photosynthetic charge separation in oriented membrane fragments immobilized in gel (Govorunova et al.) 53
Charge transition
Temperature effects on counterion binding to spherical polyelectrolytes: the charge–discharge transition of lignosulfonate (Mafé et al.) 367
Chemiluminescence
Electropermeabilization of peripheral blood phagocytes induces a long-lived cell membrane alteration which does not affect their viability (Sixou, Teissié) 129
Chemiosmosis
Acid–base reactions as driving force in metabolism, ATP synthases and ion-motive ATP-ases: the role of the oxide anion (Madeira) 45
Chlorophyll
Indirect reduction of cytochrome b559 in isolated reaction centres of photosystem II by exogenous flavins (Klein et al.) 9
Light energy conversion with chlorophyll *a* and pheophytin *a* monolayers at the optically transparent SnO_2 electrode: artificial photosynthesis (Volkov et al.) 333
Chlorophyll *a*
Electrochemical study on the interaction between cytochrome *c* and chlorophyll *a* (Agostiano, Catucci) 15
Cholera toxin
Liposome and proteoliposome fusion onto solid substrates, studied using atomic force microscopy, quartz crystal microbalance and surface plasmon resonance. Biological activities of incorporated components (Ohlsson et al.) 137
Chronic exposure
Effects of chronic exposure to ELF magnetic fields on the reproductive system of female mice (Picazo et al.) 173
Clausius–Mossotti factors
Hysteresis loops in the low frequency region of the Clausius–Mossotti polarization factor: the result of non-linear boundary conditions at the particle interface (Paddison et al.) 321
Colloidal gold
Adsorptive stripping voltammetric behaviour of colloidal gold and immunogold on carbon paste electrode (González García, Costa García) 389
Computer simulations
Interfacing cultured neurons to planar substrate microelectrodes: characterization of the neuron-to-microelectrode junction (Bove et al.) 255
Conducting polymer films
The electrochemistry of neurotransmitters at conducting organic polymer electrodes: electrocatalysis and analytical applications (Mark, Jr. et al.) 229
Conducting polymers
Artificial muscles based on conducting polymers (Otero, Sansiñena) 411
Counterion binding
Temperature effects on counterion binding to spherical polyelectrolytes: the charge–discharge transition of lignosulfonate (Mafé et al.) 367
Cross-linking
The role of flavodoxin in the reaction catalysed by the glutamate synthase from *Monoraphidium braunii* (Vigara et al.) 21
Crown ethers
The electrochemistry of neurotransmitters at conducting organic polymer electrodes: electrocatalysis and analytical applications (Mark, Jr. et al.) 229
Cyanobacterial membranes
Functional and immunological characterization of both "mitochondria-like" and "chloroplast-like" electron/proton transport proteins in isolated and purified cyanobacterial membranes (Dworsky et al.) 35
Cyclic voltammetry
Cyclic voltammetry of mitomycin C and DNA (Teijeiro et al.) 77
Analysis of the performance of microelectrodes by cyclic and differential pulse voltammetry techniques (Eichenberger et al.) 315
Nitro radical anion formation from nifurtimox II: electrochemical evidence (Núñez-Vergara et al.) 355
Comparative studies of the interfacial behaviour of some nucleic acid bases with and without thio group (Ahmed et al.) 359
Cyclic voltammograms
The electrochemistry of neurotransmitters at conducting organic poly-

mer electrodes: electrocatalysis and analytical applications (Mark, Jr. et al.) 229
Cyclotron resonance
Testing the ion cyclotron resonance theory of electromagnetic field interaction with odd and even harmonic tuning for cations (Smith et al.) 161
Cytochrome *b*559
Indirect reduction of cytochrome b559 in isolated reaction centres of photosystem II by exogenous flavins (Klein et al.) 9
Cytochrome *c*
Electrochemical study on the interaction between cytochrome *c* and chlorophyll *a* (Agostiano, Catucci) 15

Delipidation
Partial delipidation of purple membranes by Tween 20: changes in surface electric properties (Taneva et al.) 111
Dextran adsorption
Increase of protoplast electrofusion supported by dextran fractions (Jiang, Berg) 383
Dextran fractions
Increase of protoplast electrofusion supported by dextran fractions (Jiang, Berg) 383
Dichromate corrosion
Spontaneous periodic and bursting current oscillations in iron corrosion by dichromate: a useful study for simulating biological systems (D'Alba, Lucarini) 185
DIDS
Red cell echinocytogenesis is correlated to the recruitment of external band-3 conformations (Gimsa) 99
Dielectric behavior
Dielectric behavior of spherical cell suspensions in relation to diffusion effects and presence of a nucleus (Gheorghiu) 123
Diffusive effects
Dielectric behavior of spherical cell suspensions in relation to diffusion effects and presence of a nucleus (Gheorghiu) 123
Diformazan
Electrostimulation of macrophage NADPH oxidase by modulated high-frequency electromagnetic fields (Gamaley et al.) 415
DLVO
Measuring surface forces in aqueous electrolyte solution with the atomic force microscope (Butt et al.) 191
DNA
Cyclic voltammetry of mitomycin C and DNA (Teijeiro et al.) 77
Dopamine
Catecholaminergic transmission in the central and peripheral nervous system as studied by electrochemistry with carbon fibre electrodes (Gonon) 247
Electrical stimulation-induced release of dopamine and noradrenaline in human blood vessels (Morgadinho et al.) 281
Fast cyclic voltammetry: neurotransmitter measurement in "real time" and "real space" (Stamford et al.) 289
An in vitro electrochemical sensing of dopamine in the presence of ascorbic acid (Kawde, Santhanam) 405

Echinocytes
Red cell echinocytogenesis is correlated to the recruitment of external band-3 conformations (Gimsa) 99
Electric polarizability
Partial delipidation of purple membranes by Tween 20: changes in surface electric properties (Taneva et al.) 111
Electrochemotherapy
Biomedical applications of electric pulses with special emphasis on antitumor electrochemotherapy (Mir et al.) 203
Electro-incorporation
Electro-incorporation of microcarriers as a method for the transdermal delivery of large molecules (Hofmann et al.) 209
Electroloading
Biomedical applications of electric pulses with special emphasis on antitumor electrochemotherapy (Mir et al.) 203
Electromagnetic fields
Effects of low frequency magnetic fields on Na,K-ATPase activity (Blank et al.) 267
An ion pump mechanism based on channel processes in the Na,K-ATPase (Blank) 275
Electron promoter
Electrochemical study on the interaction between cytochrome *c* and chlorophyll *a* (Agostiano, Catucci) 15
Electron transfer
Photosystem II core phosphorylation heterogeneity and the regulation of electron transfer in higher plants: a review (Giardi et al.) 67
Electron transfer between viologen derivatives and the flavoprotein ferredoxin-$NADP^+$ reductase (Bes et al.) 179
Electron-transport proteins
Functional and immunological characterization of both "mitochondria-like" and "chloroplast-like" electron/proton transport proteins in isolated and purified cyanobacterial membranes (Dworsky et al.) 35
Electropermeabilization
Electropermeabilization of peripheral blood phagocytes induces a long-lived cell membrane alteration which does not affect their viability (Sixou, Teissié) 129
Re-examination of electropermeabilization on yeast cells: dependence on growth phase and ion concentration (Tatebe et al.) 149
Biomedical applications of electric pulses with special emphasis on antitumor electrochemotherapy (Mir et al.) 203
Electrophoresis
The 36 kDa form of ferredoxin–$NADP^+$ reductase from *Anabaena* co-purifies with phycobiliproteins (Razquin et al.) 57
Effect of salts on the electrophoretic mobility of *Synechococcus* PCC 7942 plasmalemma vesicles from cells grown on different nitrogen sources (Zinovieva et al.) 169
Electrophoretic mobility
Partial delipidation of purple membranes by Tween 20: changes in surface electric properties (Taneva et al.) 111
Electropulsing
Electropulsing of acinar cells isolated from rat pancreas: dependence of reversible membrane perforation on cellular energy state (Kosowski et al.) 377
Electrostimulated release
Electrical stimulation-induced release of dopamine and noradrenaline in human blood vessels (Morgadinho et al.) 281
Electrostimulation
Possibilities and problems of low frequency weak electromagnetic fields in cell biology (Berg) 153
Electrostimulation of macrophage NADPH oxidase by modulated high-frequency electromagnetic fields (Gamaley et al.) 415
ELF magnetic fields
Effects of low frequency magnetic fields on Na,K-ATPase activity (Blank et al.) 267
Energy state
Electropulsing of acinar cells isolated from rat pancreas: dependence of reversible membrane perforation on cellular energy state (Kosowski et al.) 377
Enzyme activation
Possibilities and problems of low frequency weak electromagnetic fields in cell biology (Berg) 153
Equivalent circuit
Interfacing cultured neurons to planar substrate microelectrodes: char-

acterization of the neuron-to-microelectrode junction (Bove et al.) 255
Erythrocyte shape
Red cell echinocytogenesis is correlated to the recruitment of external band-3 conformations (Gimsa) 99
ESCA
The electrochemistry of neurotransmitters at conducting organic polymer electrodes: electrocatalysis and analytical applications (Mark, Jr. et al.) 229
Escherichia coli
A polarographic study of the catalytic mechanism of the iron-containing superoxide dismutase from *Escherichia coli* (Argese et al.) 397

Female reproduction
Effects of chronic exposure to ELF magnetic fields on the reproductive system of female mice (Picazo et al.) 173
Ferredoxin–$NADP^+$ reductase
The 36 kDa form of ferredoxin–$NADP^+$ reductase from *Anabaena* co-purifies with phycobiliproteins (Razquin et al.) 57
Ferredoxin-$NADP^+$ reductase
Electron transfer between viologen derivatives and the flavoprotein ferredoxin-$NADP^+$ reductase (Bes et al.) 179
Flavodoxin
The role of flavodoxin in the reaction catalysed by the glutamate synthase from *Monoraphidium braunii* (Vigara et al.) 21
Fluorescence anisotropy
Fluorescence anisotropy of fluorescein phosphatidylethanolthiocarbamide in lipid bilayers and in Ca^{2+}-ATPase/lipid reconstituted systems (Henao et al.) 117

Galactosyl ascorbic acid
Oxidized intermediates formed from α- and β-galactosyl ascorbic acid by pulse radiolysis (Nakata et al.) 85
Ganglioside
Liposome and proteoliposome fusion onto solid substrates, studied using atomic force microscopy, quartz crystal microbalance and surface plasmon resonance. Biological activities of incorporated components (Ohlsson et al.) 137
Gel electrophoresis
Indirect reduction of cytochrome b559 in isolated reaction centres of photosystem II by exogenous flavins (Klein et al.) 9
Glucose
The role of catecholamines as mediators in the glucose oxidase/glucose system (Alfaro et al.) 307
Glutamate synthase
The role of flavodoxin in the reaction catalysed by the glutamate synthase from *Monoraphidium braunii* (Vigara et al.) 21
Graphite electrode
Investigation of the electrochemical properties of horseradish peroxidase adsorbed on solid graphite in the presence of monoclonal antibodies against the enzyme (Yaropolov et al.) 401
Growth phase
Re-examination of electropermeabilization on yeast cells: dependence on growth phase and ion concentration (Tatebe et al.) 149

Halobacterium
Measuring surface forces in aqueous electrolyte solution with the atomic force microscope (Butt et al.) 191
Helmholtz coils
Effects of chronic exposure to ELF magnetic fields on the reproductive system of female mice (Picazo et al.) 173
Herbicides
Evaluation of the photosynthesis inhibitory effect of new sulfonylureas derivatives on *Oxalis pes-caprae* (Temsamani et al.) 63
Higher plants
Photosystem II core phosphorylation heterogeneity and the regulation of electron transfer in higher plants: a review (Giardi et al.) 67
HMDE
Electrochemical study on the interaction between cytochrome *c* and chlorophyll *a* (Agostiano, Catucci) 15
Horseradish peroxidase
Investigation of the electrochemical properties of horseradish peroxidase adsorbed on solid graphite in the presence of monoclonal antibodies against the enzyme (Yaropolov et al.) 401
[^{3}H]TPP^+ uptake
Influence of oxidative stress on membrane potential and on K^+ channels in neuronal cells (Agostinho et al.) 297
Hysteresis
Hysteresis loops in the low frequency region of the Clausius–Mossotti polarization factor: the result of non-linear boundary conditions at the particle interface (Paddison et al.) 321

ICR theory
Testing the ion cyclotron resonance theory of electromagnetic field interaction with odd and even harmonic tuning for cations (Smith et al.) 161
Immobilization
Photosynthetic charge separation in oriented membrane fragments immobilized in gel (Govorunova et al.) 53
Immunoelectrochemistry
Adsorptive stripping voltammetric behaviour of colloidal gold and immunogold on carbon paste electrode (González García, Costa García) 389
Immunological characterization
Functional and immunological characterization of both "mitochondria-like" and "chloroplast-like" electron/proton transport proteins in isolated and purified cyanobacterial membranes (Dworsky et al.) 35
Immunological gold
Adsorptive stripping voltammetric behaviour of colloidal gold and immunogold on carbon paste electrode (González García, Costa García) 389
Implantable microelectrodes
Fast cyclic voltammetry: neurotransmitter measurement in "real time" and "real space" (Stamford et al.) 289
Inductive coupling
Electrostimulation of yeast proliferation (Fiedler et al.) 423
Ionic influence
Re-examination of electropermeabilization on yeast cells: dependence on growth phase and ion concentration (Tatebe et al.) 149
Ion pumps
An ion pump mechanism based on channel processes in the Na,K-ATPase (Blank) 275
Iron superoxide dismutase
A polarographic study of the catalytic mechanism of the iron-containing superoxide dismutase from *Escherichia coli* (Argese et al.) 397

K^+-channel blockers
Influence of oxidative stress on membrane potential and on K^+ channels in neuronal cells (Agostinho et al.) 297
Kinetics
Nitro radical anion formation from nifurtimox II: electrochemical evidence (Núñez-Vergara et al.) 355

Langmuir–Blodgett films
Light energy conversion with chlorophyll *a* and pheophytin *a* monolayers at the optically transparent SnO_2 electrode: artificial photosynthesis (Volkov et al.) 333

Light scattering
Partial delipidation of purple membranes by Tween 20: changes in surface electric properties (Taneva et al.) 111
Lignosulfonate
Temperature effects on counterion binding to spherical polyelectrolytes: the charge–discharge transition of lignosulfonate (Mafé et al.) 367
Lipid bilayer
Fluorescence anisotropy of fluorescein phosphatidylethanolthiocarbamide in lipid bilayers and in Ca^{2+}-ATPase/lipid reconstituted systems (Henao et al.) 117
Lipid impregnation
Time-dependent variation in a.c. impedance of lipid-impregnated membrane filters (Ikematsu et al.) 343
Liposome fusion
Liposome and proteoliposome fusion onto solid substrates, studied using atomic force microscopy, quartz crystal microbalance and surface plasmon resonance. Biological activities of incorporated components (Ohlsson et al.) 137
Liposomes
Electro-incorporation of microcarriers as a method for the transdermal delivery of large molecules (Hofmann et al.) 209
Long-term recording
Interfacing cultured neurons to planar substrate microelectrodes: characterization of the neuron-to-microelectrode junction (Bove et al.) 255
Low frequency
Hysteresis loops in the low frequency region of the Clausius–Mossotti polarization factor: the result of non-linear boundary conditions at the particle interface (Paddison et al.) 321
Low frequency electrostimulation
Electrostimulation of yeast proliferation (Fiedler et al.) 423

Macrophage activation
Electrostimulation of macrophage NADPH oxidase by modulated high-frequency electromagnetic fields (Gamaley et al.) 415
Meander electrodes
Electro-incorporation of microcarriers as a method for the transdermal delivery of large molecules (Hofmann et al.) 209
Membrane capacitance
Electrophysiological and electrochemical techniques for studying control mechanisms of secretion in neuroendocrine cells (Neher, Chow) 251
Membrane complex
Effect of phospholipid membranes on α-thrombin activity (Lecompte et al.) 105
Membrane enzyme
Effects of low frequency magnetic fields on Na,K-ATPase activity (Blank et al.) 267
Membrane enzymes
An ion pump mechanism based on channel processes in the Na,K-ATPase (Blank) 275
Membrane filters
Time-dependent variation in a.c. impedance of lipid-impregnated membrane filters (Ikematsu et al.) 343
Membrane flexibility
Increase of protoplast electrofusion supported by dextran fractions (Jiang, Berg) 383
Membrane fragments
Photosynthetic charge separation in oriented membrane fragments immobilized in gel (Govorunova et al.) 53
Membrane permeabilization
Factors affecting transdermal delivery of metoprolol by electroporation (Vanbever, Préat) 223
Membrane potential
Influence of oxidative stress on membrane potential and on K^+ channels in neuronal cells (Agostinho et al.) 297
Metoprolol
Factors affecting transdermal delivery of metoprolol by electroporation (Vanbever, Préat) 223
Microcarriers
Electro-incorporation of microcarriers as a method for the transdermal delivery of large molecules (Hofmann et al.) 209
Mitomycin C
Cyclic voltammetry of mitomycin C and DNA (Teijeiro et al.) 77
Modified mercury electrode
Cyclic voltammetry of mitomycin C and DNA (Teijeiro et al.) 77
Modulated HF
Electrostimulation of macrophage NADPH oxidase by modulated high-frequency electromagnetic fields (Gamaley et al.) 415
Modulated high frequency
Electrostimulation of yeast proliferation (Fiedler et al.) 423
Molecular mass effect
Increase of protoplast electrofusion supported by dextran fractions (Jiang, Berg) 383
Monoclonal antibody
Investigation of the electrochemical properties of horseradish peroxidase adsorbed on solid graphite in the presence of monoclonal antibodies against the enzyme (Yaropolov et al.) 401
Monolayers
Light energy conversion with chlorophyll *a* and pheophytin *a* monolayers at the optically transparent SnO_2 electrode: artificial photosynthesis (Volkov et al.) 333

NADPH oxidase stimulation
Electrostimulation of macrophage NADPH oxidase by modulated high-frequency electromagnetic fields (Gamaley et al.) 415
Na,K-ATPase
Effects of low frequency magnetic fields on Na,K-ATPase activity (Blank et al.) 267
An ion pump mechanism based on channel processes in the Na,K-ATPase (Blank) 275
Networks of neurons
Interfacing cultured neurons to planar substrate microelectrodes: characterization of the neuron-to-microelectrode junction (Bove et al.) 255
Neuroendocrine cells
Electrophysiological and electrochemical techniques for studying control mechanisms of secretion in neuroendocrine cells (Neher, Chow) 251
Neurotransmitter
Fast cyclic voltammetry: neurotransmitter measurement in "real time" and "real space" (Stamford et al.) 289
Neurotransmitters
The electrochemistry of neurotransmitters at conducting organic polymer electrodes: electrocatalysis and analytical applications (Mark, Jr. et al.) 229
Nifurtimox
Nitro radical anion formation from nifurtimox II: electrochemical evidence (Núñez-Vergara et al.) 355
Nitrogen sources
Effect of salts on the electrophoretic mobility of *Synechococcus* PCC 7942 plasmalemma vesicles from cells grown on different nitrogen sources (Zinovieva et al.) 169
Nitro radical anion
Nitro radical anion formation from nifurtimox II: electrochemical evidence (Núñez-Vergara et al.) 355

Noradrenaline
Catecholaminergic transmission in the central and peripheral nervous system as studied by electrochemistry with carbon fibre electrodes (Gonon) 247
Electrical stimulation-induced release of dopamine and noradrenaline in human blood vessels (Morgadinho et al.) 281
Nucleic acids
Comparative studies of the interfacial behaviour of some nucleic acid bases with and without thio group (Ahmed et al.) 359

O_2-maximum damping
Increase of protoplast electrofusion supported by dextran fractions (Jiang, Berg) 383
Orientation
Photosynthetic charge separation in oriented membrane fragments immobilized in gel (Govorunova et al.) 53
Oxidated polymer
Artificial muscles based on conducting polymers (Otero, Sansiñena) 411
Oxidation
The role of catecholamines as mediators in the glucose oxidase/glucose system (Alfaro et al.) 307
Oxidative stress
Influence of oxidative stress on membrane potential and on K^+ channels in neuronal cells (Agostinho et al.) 297
Oxide anion
Acid–base reactions as driving force in metabolism, ATP synthases and ion-motive ATP-ases: the role of the oxide anion (Madeira) 45
Oxygenation activities
Electropermeabilization of peripheral blood phagocytes induces a long-lived cell membrane alteration which does not affect their viability (Sixou, Teissié) 129

Pancreas
Electropulsing of acinar cells isolated from rat pancreas: dependence of reversible membrane perforation on cellular energy state (Kosowski et al.) 377
Patch-clamp
Electrophysiological and electrochemical techniques for studying control mechanisms of secretion in neuroendocrine cells (Neher, Chow) 251
Phagocytes
Electropermeabilization of peripheral blood phagocytes induces a long-lived cell membrane alteration which does not affect their viability (Sixou, Teissié) 129
Pheophytin
Light energy conversion with chlorophyll *a* and pheophytin *a* monolayers at the optically transparent SnO_2 electrode: artificial photosynthesis (Volkov et al.) 333
Phosphatidylcholine
Fluorescence anisotropy of fluorescein phosphatidylethanolthiocarbamide in lipid bilayers and in Ca^{2+}-ATPase/lipid reconstituted systems (Henao et al.) 117
Phospholipid
Liposome and proteoliposome fusion onto solid substrates, studied using atomic force microscopy, quartz crystal microbalance and surface plasmon resonance. Biological activities of incorporated components (Ohlsson et al.) 137
Phospholipid gels
Charge recombination kinetics of photosynthetic reaction centers in water-in-oil phospholipid organogels (Agostiano et al.) 25
Phospholipids
Effect of phospholipid membranes on α-thrombin activity (Lecompte et al.) 105
Phosphorylation
Photosystem II core phosphorylation heterogeneity and the regulation of electron transfer in higher plants: a review (Giardi et al.) 67
Photobioelectrochemistry
Light energy conversion with chlorophyll *a* and pheophytin *a* monolayers at the optically transparent SnO_2 electrode: artificial photosynthesis (Volkov et al.) 333
Photosynthesis
Photosynthetic charge separation in oriented membrane fragments immobilized in gel (Govorunova et al.) 53
Photosynthesis inhibitors
Evaluation of the photosynthesis inhibitory effect of new sulfonylureas derivatives on *Oxalis pes-caprae* (Temsamani et al.) 63
Photosynthetic reaction centers
Charge recombination kinetics of photosynthetic reaction centers in water-in-oil phospholipid organogels (Agostiano et al.) 25
Photosystem II
Indirect reduction of cytochrome b559 in isolated reaction centres of photosystem II by exogenous flavins (Klein et al.) 9
Photosystem II core phosphorylation heterogeneity and the regulation of electron transfer in higher plants: a review (Giardi et al.) 67
Phycobiliproteins
The 36 kDa form of ferredoxin–$NADP^+$ reductase from *Anabaena* co-purifies with phycobiliproteins (Razquin et al.) 57
Pituitary cells
Electrophysiological and electrochemical techniques for studying control mechanisms of secretion in neuroendocrine cells (Neher, Chow) 251
Planar substrate microelectrodes
Interfacing cultured neurons to planar substrate microelectrodes: characterization of the neuron-to-microelectrode junction (Bove et al.) 255
Plasmalemma vesicles
Effect of salts on the electrophoretic mobility of *Synechococcus* PCC 7942 plasmalemma vesicles from cells grown on different nitrogen sources (Zinovieva et al.) 169
Polycarbazole electrode
An in vitro electrochemical sensing of dopamine in the presence of ascorbic acid (Kawde, Santhanam) 405
Polymer movement
Artificial muscles based on conducting polymers (Otero, Sansiñena) 411
Proliferation changes
Possibilities and problems of low frequency weak electromagnetic fields in cell biology (Berg) 153
Protein channels
An ion pump mechanism based on channel processes in the Na,K-ATPase (Blank) 275
Pulse radiolysis
Oxidized intermediates formed from α- and β-galactosyl ascorbic acid by pulse radiolysis (Nakata et al.) 85
Purple membrane
Measuring surface forces in aqueous electrolyte solution with the atomic force microscope (Butt et al.) 191
Purple membranes
Partial delipidation of purple membranes by Tween 20: changes in surface electric properties (Taneva et al.) 111

QCM
Liposome and proteoliposome fusion onto solid substrates, studied using atomic force microscopy, quartz crystal microbalance and surface plasmon resonance. Biological activities of incorporated components (Ohlsson et al.) 137

Raphanus sativus
Testing the ion cyclotron resonance theory of electromagnetic field interaction with odd and even harmonic tuning for cations (Smith et al.) 161
Rat brain
Catecholaminergic transmission in the central and peripheral nervous system as studied by electrochemistry with carbon fibre electrodes (Gonon) 247
Resealing phloxine B
Re-examination of electropermeabilization on yeast cells: dependence on growth phase and ion concentration (Tatebe et al.) 149
Resonance harmonics
Testing the ion cyclotron resonance theory of electromagnetic field interaction with odd and even harmonic tuning for cations (Smith et al.) 161
Respiration
Functional and immunological characterization of both "mitochondria-like" and "chloroplast-like" electron/proton transport proteins in isolated and purified cyanobacterial membranes (Dworsky et al.) 35
Retina cells
Influence of oxidative stress on membrane potential and on K^+ channels in neuronal cells (Agostinho et al.) 297
Rhodobacter sphaeroides
Charge recombination kinetics of photosynthetic reaction centers in water-in-oil phospholipid organogels (Agostiano et al.) 25

Sarcoplasmic reticulum
Fluorescence anisotropy of fluorescein phosphatidylethanolthiocarbamide in lipid bilayers and in Ca^{2+}-ATPase/lipid reconstituted systems (Henao et al.) 117
Sealing impedance
Interfacing cultured neurons to planar substrate microelectrodes: characterization of the neuron-to-microelectrode junction (Bove et al.) 255
Serotonine and substance P oxidation
Analysis of the performance of microelectrodes by cyclic and differential pulse voltammetry techniques (Eichenberger et al.) 315
Spherical polyelectrolytes
Temperature effects on counterion binding to spherical polyelectrolytes: the charge–discharge transition of lignosulfonate (Mafé et al.) 367
SPR
Liposome and proteoliposome fusion onto solid substrates, studied using atomic force microscopy, quartz crystal microbalance and surface plasmon resonance. Biological activities of incorporated components (Ohlsson et al.) 137
Sulfonylurea derivatives
Evaluation of the photosynthesis inhibitory effect of new sulfonylureas derivatives on *Oxalis pes-caprae* (Temsamani et al.) 63
Superoxide dismutase
A method to detect superoxide radicals using Teflon membrane and superoxide dismutase (Song et al.) 419
Superoxide radicals
A method to detect superoxide radicals using Teflon membrane and superoxide dismutase (Song et al.) 419
Surface forces
Measuring surface forces in aqueous electrolyte solution with the atomic force microscope (Butt et al.) 191
Synechococcus
Effect of salts on the electrophoretic mobility of *Synechococcus* PCC 7942 plasmalemma vesicles from cells grown on different nitrogen sources (Zinovieva et al.) 169

Thioguanine
Comparative studies of the interfacial behaviour of some nucleic acid bases with and without thio group (Ahmed et al.) 359
Thioguanosine
Comparative studies of the interfacial behaviour of some nucleic acid bases with and without thio group (Ahmed et al.) 359
α-Thrombin
Effect of phospholipid membranes on α-thrombin activity (Lecompte et al.) 105
Thrombin binding
Effect of phospholipid membranes on α-thrombin activity (Lecompte et al.) 105
Thylacoid membrane
Evaluation of the photosynthesis inhibitory effect of new sulfonylureas derivatives on *Oxalis pes-caprae* (Temsamani et al.) 63
Transdermal delivery
Electro-incorporation of microcarriers as a method for the transdermal delivery of large molecules (Hofmann et al.) 209
Factors affecting transdermal delivery of metoprolol by electroporation (Vanbever, Préat) 223
Tuned fields
Testing the ion cyclotron resonance theory of electromagnetic field interaction with odd and even harmonic tuning for cations (Smith et al.) 161
Tween 20
Partial delipidation of purple membranes by Tween 20: changes in surface electric properties (Taneva et al.) 111

Viologens
Electron transfer between viologen derivatives and the flavoprotein ferredoxin-$NADP^+$ reductase (Bes et al.) 179
Voltammetric sampling
Fast cyclic voltammetry: neurotransmitter measurement in "real time" and "real space" (Stamford et al.) 289
Voltammogram
Cephalosporin antibiotics at carbon paste and modified carbon paste electrodes in both aqueous and biological media (Abo El-Maali et al.) 91

Water–oil phases
Charge recombination kinetics of photosynthetic reaction centers in water-in-oil phospholipid organogels (Agostiano et al.) 25

Yeast
Re-examination of electropermeabilization on yeast cells: dependence on growth phase and ion concentration (Tatebe et al.) 149
Yeast proliferation
Electrostimulation of yeast proliferation (Fiedler et al.) 423
